AdvaNShield[®]

NBPT

The AdvaNShield Inhibited range, introduced at Lamma 24, addresses the need for nitrogen to remain available to crops longer and reduces ammonia emissions. DEFRA's option 4 standard, effective from 1st April 2024, mandates using inhibited urea-based fertilisers outside the 15th January-31st March window, unless advised otherwise. This includes UAN with ureic nitrogen. Nitrasol's AdvaNShield NBPT is now available for on-farm treatment. It features a water-based solution with the active urease inhibitor N-(n-Butyl) thiophosphoric triamide (NBPT), offering safer handling and effective volatilisation protection.

Liquid Fertiliser Grade	Per 1 Tonne
30N	0.7L
30N+ Sulphur	0.7L
28N	0.7L
27N+5SO ₃	0.6L
25N+7SO ₃	0.6L
24N+8SO ₃	0.5L
22N+12SO ₃	0.5L
15N+15SO ₃	0.3L

Key Benefits of AdvaNShield NBPT

- Added on farm into sprayer alongside untreated UAN liquid fertiliser
- 25% NBPT solvent free water-based solution
- Non Toxic
- pH neutral
- Easy to measure and apply
- Reduces N Loss by 50%+
- Free of dangerous NMP so is safe to handle
- Can stay mixed for up to 48 hours
- Available in 10L cans or 1000L IBC's
